

AI DISHA PROGRAM DOCUMENT

"AI Practitioner to AI Agent Builder Program"

1. PROGRAM OVERVIEW

Duration:

- 45 Days (Core Learning)
- Extended ecosystem: ~2 months engagement

Total Learning Hours: ~70 hours

Mode:

- Live sessions (primary)
 - Workshops
 - Hackathons
 - Projects + Internship pipeline
-

2. PROGRAM STRUCTURE (FROM BOARD)

Core Components

1. Python Foundation
2. AI Fundamentals
3. AI Tools (Text, Image, Audio, Video, Code)
4. AI in Cybersecurity
5. AI Trends & Jobs

6. **AI in Robotics**
 7. **AI Agent Development (Core Outcome)**
 8. **Projects & Assessment**
 9. **Internship & Job Preparation**
-

3. DELIVERY MODEL

Learning Format

1. Live Streaming (Primary)

- Frequency: **3–4 sessions/week**
- Duration: 60–90 mins/session
- Focus:
 - Concepts
 - Live coding
 - Tool demos

2. Workshops

- Hands-on deep dives
- Frequency: Weekly / bi-weekly
- Topics:
 - AI tools
 - Agent building
 - Deployment

3. Hackathons

- Budget: ~15K–20K
- Target: ~25 participants per event
- Output:
 - Real projects

- Talent identification

4. Demo Projects

- Continuous
 - Conversion goal:
 - 10% → 70% engagement improvement
-

4. 🧠 45-DAY CURRICULUM (CONDENSED STRUCTURE)

🧩 Phase 1: Python (Days 1–10)

- Basics → APIs → Mini chatbot

🧠 Phase 2: AI Fundamentals (Days 11–15)

- AI concepts
- Prompt engineering

🔧 Phase 3: AI Tools (Days 16–22)

- Text, image, audio, video, code AI

🔒 Phase 4: Cybersecurity (Days 23–26)

- AI in security
- Data protection

📈 Phase 5: Trends & Jobs (Days 27–29)

- AI careers
- Portfolio building

🤖 Phase 6: Robotics (Days 30–32)

- AI + robotics basics

Phase 7: AI Agents (Days 33–40)

- Core builds:
 - Research agent
 - Code agent
 - Multi-tool agent

Phase 8: Projects (Days 41–43)

- Final project

Phase 9: Career Prep (Days 44–45)

- Resume
 - Interview
-

5. KEY OUTPUTS

Each student produces:

-  3–5 Projects
 -  1 AI Agent
 -  Portfolio (GitHub)
 -  Resume
 -  Demo-ready product
-

6. PROGRAM OPERATIONS (FROM BOARD 2)

Team Structure

Core Roles:

- **Finance Manager**
- **Company Registration / Admin**

- **Office Operations**
 - **Marketing Team**
 - Pre-sales activities
 - **Trainers**
 - **After Sales / Support**
 - **Internship Coordinator**
 - **Operations Manager**
 - **Facility Management**
 - **Tech Support**
 - **Guest Lecturers**
-

Example Role Mapping (from board notes)

- Trainers → Surya
 - Internship → Vinod
 - Operations → Indra
 - Tech Support → Indra
 - Facility → Harsha + team
-

7. MARKETING & OUTREACH

Channels:

- 1. Colleges**
 - Mini programs
 - Workshops
- 2. Social Media**
 - Daily content
- 3. Website funnel**
- 4. Previous batch referrals**

5. Events / fun engagement

Funnel Strategy

- Awareness → Workshops → Demo → Enrollment
 - Demo conversion target: **10% → 70% improvement**
-

8. 💰 PRICING & REVENUE MODEL

Indicative Pricing (from board):

- ₹5K – ₹10K per student
 - Target:
 - 600+ students (scale phase)
 - Revenue potential:
 - ₹30L+ (approx scaling projection)
-

Batch Strategy

- 2 batches/month
 - Each batch:
 - 25–100 learners
-

9. 🧪 HACKATHON MODEL

Structure:

- Entry: Internal + external
- Team size: 3–5
- Duration: 24–48 hours

Output:

- AI prototypes
 - Talent hiring pipeline
-

10. AI AGENT FOCUS (CORE DIFFERENTIATOR)

Students will build:

1. Research Agent

- Input → topic
- Output → structured report

2. Code Assistant Agent

- Debug + generate code

3. Automation Agent

- Multi-step workflows

4. Multi-tool Agent

- Search + summarize + output
-

11. ASSESSMENT SYSTEM

Evaluation Breakdown (aligned to board notes)

- Assignments: 15–25%
 - Projects: 40–50%
 - Final Project: 20–30%
 - Participation: 10%
-

12. CERTIFICATION CRITERIA

- Completed all modules
 - Built at least 1 AI agent
 - Submitted final project
 - Attended $\geq 70\%$ sessions
-

13. INTERNSHIP & JOB PIPELINE

Flow:

1. Training
2. Internal project work
3. Internship allocation
4. Placement prep

Companies (indicative from board):

- TCS
 - Infosys
 - Amazon (aspirational targets)
-

14. INFRASTRUCTURE

Required:

- LMS (content + tracking)
 - Live streaming tools
 - API access (LLMs)
 - GitHub for projects
 - Community (Discord/WhatsApp)
-

15. SCALING PLAN

Phase 1:

- 1–2 batches
- Manual delivery

Phase 2:

- College partnerships
- Workshops expansion

Phase 3:

- Pan-India reach
 - Hybrid + recorded content
-

16. SUCCESS METRICS

- Enrollment count
 - Completion rate
 - Project quality
 - Placement rate
 - Revenue per batch
-

17. FINAL VISION

Build a program where learners:

- Don't just "learn AI"
- Actually **build AI products & agents**
- Become **job-ready or startup-ready**
